

# PLOT THE TOT: A COLLABORATIVE MAP TO OPTIMAL OUTCOMES

## COURSE DESCRIPTION

As healthcare providers wanting rapid results to help our patients, a synchronized team approach is the best way to achieve that. Helping patients often requires multiple specialists to work together for best outcomes. Our collaborative and methodical approach allows us to view the whole patient and implement comprehensive care. This approach provides more predictable results and outcomes, while navigating the topography of TOTs in the healthcare community. See implementation of the E3 Model of Care with patients (infant, child, and adult) on their journey from initial evaluation, education, and execution of a treatment plan. Real patients, real evaluations, real surgeries in this course! This course is an advanced specialty training that is targeted for Speech-Language Pathologists, Occupational Therapists, Orofacial Myofunctional Therapists, Lactation Consultants, Physicians and Dentists.

### AGENDA DAY 1

- ✓ Registration
- ✓ Introduction
- ✓ Collaboration Philosophy
- ✓ Definitions, Background and Comorbidities
- ✓ Evaluations, Therapy and Patient Education
- ✓ Setting Up Your Practice for Releases

### AGENDA DAY 2

- ✓ Registration
- ✓ Questions, Discussion and Review
- ✓ Surgical Procedures
- ✓ Case Specific Examples and Troubleshooting
- ✓ The Sleep Connection
- ✓ Follow-Up Therapy and Outcomes
- ✓ Laser Wet Lab with Pig Jaws
- ✓ Conclusion, Discussion and Questions

### OBJECTIVES

- ✓ Define the E3 Model of Care components from both the allied health and the release provider perspectives
- ✓ Formulate a workable vocabulary to create a communication script between allied health providers, release providers, and patients
- ✓ Describe how to develop and maintain a multidisciplinary care team using the E3 Model of Care
- ✓ Explain the rationale for accountability between allied health and release providers using the E3 Model of Care
- ✓ Identify key indicators to determine when a release is recommended
- ✓ Create descriptive and objective phrases for documentation of both release procedures and progress toward functional outcomes
